ABSTRACT OF THE DISCLOSURE

A hinge system includes one end (1) belonging to a first rigid element (7) and one end (3) belonging to a second rigid element (8), the ends having support surfaces which can be matched to one another. Elastic elements (18) are provided in order to maintain the pressure contact between the surfaces. The system also includes at least one immaterial pivot point which can move in two orthogonal planes within the limits allowed by guide means (6) and elements (19a-b) which only authorise pivoting in one plane or in a certain number of planes having a determined orientation.
